

Argos instantly accesses all client account details so you can respond promptly and professionally.

But don't just take our word for it.

"We use the arrears system as our major control for overdues. The ease with which we can monitor, alter and produce our letters means we spend just 1-2 hours weekly on arrears because the system is so thorough. We love it!"

Finance & Investments

"I think the Fixed Loan system is great. It is so easy to use and keep track of arrears. The overdue letter system and communications are brilliant!"

Basecorp Finance Limited

fixed loan system

Speed and flexibility...

Another unique Argos key benefit.

This system is designed to cater for any sort of loan where the interest component is known at the time the loan document is drawn up. Typical examples of fixed loans are Hire Purchase Contracts, Consumer Loans, Instruments by way of Security and Personal Loans.

- **Contract Enquiries.** Argos has developed a specific enquiry screen so you can promptly respond to any client enquiries virtually as soon as they identify themselves. The speed of account access is extremely fast with details of current position and account history available on a single screen at the click of a button.
- **Contract Flexibility.** The system has been designed to allow flexibility in the set up of fixed loan contracts so you can structure repayment profiles in the way your customers want. If a client has difficulty repaying or needs to re-finance, the terms can be easily altered within the existing contract, without having to set up a new one.
