

Argos offers accurate balance sheet analysis to help you better manage your business.

But don't just take our word for it.

"The General Ledger control is our ultimate check that everything has been entered correctly. It provides a great overview of the whole system."

Mortgages & More

general ledger

Business performance snapshot... Another unique Argos key benefit.

CashBook postings can be made directly to the General Ledger at any time. All other systems have their balances posted to the General Ledger as part of the month end procedure, or more regularly if you require. The General Ledger System pulls all of the information from all the other Argos systems into one area, which then provides you with a summary of your business position and profitability.

- Integration means Accuracy. The General Ledger provides the main control over all other systems which ensures the accuracy of information being processed, and provides an excellent but simple check each month.
- Positive Business Planning. You get accurate profit and loss figures as well as an analysis of your balance sheet immediately after the GL posting has been run on the accounts systems. This allows you to make important and well-informed management decisions based on this information...a significant benefit in these highly-competitive times.
